- Information Learned

▼ Challenge Description

- Welcome to Full Stack Conf, explore the future of JavaScript with a lineup of industry professionals and discover new techniques to advance your career as a web developer. But be very careful with the stay up to date form, we don't sanitize anything and the admin logs in and checks the emails regularly, don't try anything funny!! 😅

Summary

- A very simple XSS is given to you in order to pop the flag and understand more about XSS in a broad sense.

Website

▼ Checking the website and the date form section mentions how to pop an XSS alert prompt to reveal the flag, which I do lol.

Information Learned

- I didn't learn anything new here, but just noted to keep watch for XSS in user input fields that are unsanitized.
